*RE: An Investigation Into The Traffic Dispute Between Windstream Kentucky East, LLC, Brandenburg Telephone Company And MCImetro Access Transmission Services, LLC d/b/a Verizon Access
Case No. 2008-00203*

Dear Ms. Stumbo:

On July 31, 2008 we filed MCImetro Access Transmission Services, LLC's responses to data requests from the Commission staff, Brandenburg Telephone Company, and Windstream Kentucky East, LLC. This letter relates to an error in the filing, which we are correcting, and to advise the Commission that we will be making a supplemental filing concerning a confidential response to Brandenburg Telephone Company.

MCImetro's response to Windstream Request No. 13 included a table. That table omitted some data. Enclosed are eleven copies of a corrected response.

MCImetro's response to Brandenburg Telephone Company Request No. 10 includes information about the physical address and V&H coordinates of points of interconnection between MCImetro and Windstream in Elizabethtown. Upon final review, we decided out of caution to treat that information as confidential. Accordingly, we have not filed that information, and will furnish it to Brandenburg Telephone Company once an appropriate non-disclosure agreement is in place. We have already provided a copy of the response to counsel for Windstream. Once we have an agreement to provide the information to Brandenburg Telephone Company, we will make a supplemental filing with a motion for confidential treatment.

REQUEST NO. 13 Please describe in detail all arrangements - whether direct or indirect - between Verizon and any other telecommunications provider in Kentucky. Please include the CLLI code of the originating carriers switching office, the CLLI code of Verizon's terminating switch and the CLLI code of the switch from which Verizon receives the traffic. Please identify all compensation arrangements associated with the traffic.

Responsible Person:

RESPONSE: Lee Olson

Objection. This request is vague; Windstream does not identify "the traffic" it is asking MCImetro to describe, nor does it define the "arrangements" MCImetro is alleged to have. Subject to that objection and without waiving it, MCImetro likely receives traffic from most if not all local telecommunications providers in Kentucky, generally via indirect interconnection. MCImetro receives traffic at ILEC tandems in each LATA, as follows:
